

## RAY TRACER X QUAD

Dual-Tilt/Dual Roller Color Multi-Beam Light on Rotating Base

Ray Tracer X Quad delivers 8 razor-sharp color RGBW beams of light for astonishing aerial effects from a rotating base. Two independently controlled rollers provide a wide-ranging 150° of tilt. In addition, pan is adjustable from 0 – 630°. Individual LED control affords completely custom programming and animations, while the built-in color programs and movement macros can create a dynamic lightshow without the need for a separate controller.

- Stunning moving light array with 2 independently controlled rollers and 8 tight multi-color beams
- Narrow, razor-sharp beams of RGBW (red/green/blue/white) light for astonishing aerial effects
- Individual LED control for completely custom programming and animations
- Built-in color programs and movement macros creates a dynamic lightshow without a controller
- ¼-turn mounting bracket included for faster setup between shows
- Power Linking enables faster setup with fewer cables
